

# FISH EXAMINATION

1. Write down three ways that all fish are alike.
2. Write three important steps in the life of a fish.
3. Draw pictures of five different kinds of fish. Label each picture with the name of the fish.
4. Tell where each of the five fish you drew lives and some other things you know about it, like what food it lives on.
5. Tell the steps a food fish like tuna or sardines goes through in getting from living in the sea to being fish meat in cans.
6. Tell what a food chain is and how it works for fish. Also tell how other animals and people may be part of it.
7. Tell some other ways that fish may affect people and other creatures in the world.
